 BRITISH RAINFALL
 80 JAN 1910

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 19 10

FORM A2.
BRITISH RAINFALL.

Kept at Lammas Wood Cemetery
Adel W. Leeds
in the County of Yorks.
by Ralph Syson

Pattern
RAIN Gauge Diameter of top 5 in.
Height of top above Ground one ft. — in.
" " " Sea Level 475 ft.
Time of Observation 9 a.m.
Nearest Railway Station Name Leeds
Distance 4 miles Direction S.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Mr. H. R. MILL, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909.

FORM A2.
BRITISH RAINFALL.
25 JAN 1910

Kept at Amcliffe (Anerdale)

in the County of Yorkshire

by A. A. Hammond

PATTERN
RAIN GAUGE Diameter of top 8 in.
Height of top above Ground 1 ft. 6 in.
" " " Sea Level 742.7 ft.

Time of Observation

Nearest Railway Station { Name Grassington
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

BRITISH RAINFALL FORM A. 1/20
24 JAN 1911

Kept at Arncliffe Vicarage
in the County of Yorkshire
by Rev W. A. Shuffrey

PATTERN
RAIN GAUGE
Diameter of top in.
Height of top above Ground ft. in.
" " " Sea Level 732 ft.
Time of Observation
Nearest Railway Station { Name
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL
26 JUN 1912

Kept at Barningham, Rawdon
in the County of York
by A. Killick, Esq.

RAIN GAUGE { Pattern _____
Diameter of top 5 in.
Height of top above Ground - ft. 9 in.
" " " Sea Level 525 ft.
Time of Observation _____
Nearest Railway Station { Name _____
Distance _____ Direction _____

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A2.
BRITISH RAINFALL
JAN 1910

Kept at Staincliffe
in the County of York
by Oscar J Kirby, A.M.S.C.B.

Pattern Flood Gauge
RAIN GAUGE Diameter of top 4 in.
Height of top above Ground 1 ft. 0 in.
" " " Sea Level 492 ft.
Time of Observation 9 A.M.
Nearest Railway Station { Name Hickumondwite
Distance 3/4 mile Direction West

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A2.
BRITISH RAINFALL.

Kept at Lov Cottage, Long Lee,
in the County of York
by Charles Croft

RAIN GAUGE Pattern Funnel with W. stand
Diameter of top 8 in.
Height of top above Ground 1 ft. 0 in.
" " " Sea Level ft.
Time of Observation 9 a.m.
Nearest Railway Station { Name Keighley
Distance 3 miles Direction N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.

Kept at East Riding Asylum, Beverley
in the County of Yorkshire
by Mervyn Archdale

Patten Symons from Reynolds
RAIN GAUGE Diameter of top 5 in.
Height of top above Ground 1 ft.
" " " Sea Level 175 ft.
Time of Observation 9 a.m.
Nearest Railway Station { Name Beverley
Distance 2 miles Direction East

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A2.
BRITISH RAINFALL.

Kept at *The Innes Birstwith*
via Leeds
in the County of *York*
by *C. S. Discon*

Pattern
RAIN GAUGE Diameter of top *5* in.
Height of top above Ground *1* ft. in.
" " " Sea Level *230* ft.
Time of Observation *9.0 m*
Nearest Railway Station Name *Birstwith*
Distance *1/4 mile* Direction *East*

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.
11 JAN 1911

Kept at Rustwell
in the County of York
by C S Dixon

Pattern
RAIN GAUGE Diameter of top 5 in.
Height of top above Ground 1 ft. in.
" " " Sea Level 230 ft.
Time of Observation 9 am
Nearest Railway Station { Name Rustwell
Distance 1/2 mile Direction N.E.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.
- 4 JAN 1911

Kept at Lisle Park Bradford

in the County of York

by Stander (for the Bradford City Council)

Pattern
RAIN GAUGE Diameter of top 8 in.
Height of top above Ground 1 ft.
" " " Sea Level 439.53 ft.
Time of Observation 9 a.m.
Nearest Railway Station { Name Bradford
Distance 1 mile Direction E

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

Jan. 1, following.

Jan. 1, following.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.

Kept at Cragg Vale, N. Yorkholme
in the County of York
by W. A. Simpson-Henchcliffe

Pattern Snowdon
RAIN GAUGE Diameter of top 5 in.
Height of top above Ground 1 ft. in.
" " " Sea Level 615 ft. approx
Time of Observation 9 am
Nearest Railway Station { Name Yorkholme
Distance 2 1/2 miles Direction SW

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

FORM A2.
BRITISH RAINFALL.
- 4 JAN 1911Kept at *Dalton on Tees Croft*in the County of *Yorkshire*by *William Weather*

Pattern
RAIN GAUGE Diameter of top *8* in.
Height of top above Ground *2* ft. *—* in.
" " " Sea Level *—* ft.
Time of Observation *9 am*
Nearest Railway Station { Name *Barnsley*
Distance *1 1/2* Direction *North*

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

Jan. 1, following.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.

Kept at Dalton Parnage
(North Riding)
in the County of Yorks
by Rev. G. H. Chilman

RAIN GAUGE
Pattern
Diameter of top five in.
Height of top above Ground one ft. — in.
" " " Sea Level 87 ft.
Time of Observation 9 am
Nearest Railway Station { Name SESSAY
Distance 1 mile Direction SSS

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1907

FORM A.
BRITISH RAINFALL.

Kept at Stanwick Park
in the County of York
by William Higgin

Lat. 54° 36' N, Long. 1° 45' W
Nearest Railway Station Mersebridge
Time of Observation 9 a.m.
Diameter of Rain Gauge 5 in.
Height of top of Gauge above Ground 1 ft.
Sea Level 300 ft.

NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. Full instructions for the measurement of rain and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

Date	Jan.	Feb.	March.	April.	May.	June.	July.	Aug.	Sept.	Oct.	Nov.	Dec.	Date.

REGISTER OF RAINFALL IN 1910

Kept at The Sewage Pumping Station, Doncaster
in the County of York (W. R.)
by The Corporation of Doncaster

Pattern (Nagel's + Lamb's)
RAIN GAUGE Diameter of top 8 in.
Height of top above Ground 1 ft. 2
" " " Sea Level 30 ft.
Time of Observation 9 am
Nearest Railway Station { Name Doncaster
Distance 3/8 mile Direction South

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A2.
BRITISH RAINFALL.
22 FEB 1910

Kept at Highfield, Driffield
in the County of York
by Robert Mason

RAIN GAUGE
Pattern
Diameter of top in.
Height of top above Ground ft. in.
" " " Sea Level ft.
Time of Observation
Nearest Railway Station { Name
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL
12 JAN 1911

Kept at Mount St. John
in the County of York N.R.
by A. J. Walker

Pattern Copper Shew Gauge
RAIN GAUGE { Diameter of top 5 in.
Height of top above Ground 1 ft. 10 in.
" " " Sea Level 54.2 ft.
Time of Observation 9 a.m.
Nearest Railway Station { Name Thirsk (N.E.R.)
Distance 4 1/2 miles Direction S 65° W (true)

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in “Rules for Rainfall Observers,” sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

Jan. 1, following.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

Jan. 1, following.

REGISTER OF RAINFALL IN 1909

FORM A2
BRITISH RAINFALL
- 3 JAN 1910

Kept at *Swinefleet*

in the County of *York*

by *Arthur Banks Hobson*

Pattern
RAIN GAUGE Diameter of top *5* in S
Height of top above Ground *1* ft.
" " " Sea Level *18* ft.

Time of Observation

Nearest Railway Station { Name *Goole*
Distance *3* ^{miles} Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910.

Kept at Chapel House, Hilary
in the County of York 10
by G. E. Clayton

Pattern Regatta Zambra
RAIN GAUGE Diameter of top 5 in.
Height of top above Ground 3 ft. — in.
" " " Sea Level 670 ft.
Time of Observation 9 a.m.
Nearest Railway Station { Name Grassington
Distance 2 1/4 Direction South

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

II Gauge

REGISTER OF RAINFALL IN 1910.

FORM A2.
BRITISH RAINFALL
11 MAR 1911

Kept at Thorpe 2nd Halifax
in the County of York. W. Riding
by J. Schuyler Pearson

Pattern
RAIN Diameter of top 5 in.
GAUGE Height of top above Ground - ft. 8 in.
" " " Sea Level 345 ft.
Time of Observation 9 a.m.
Nearest Railway Station { Name Triangle
Distance 1/2 M Direction N.E.

IMPORTANT NOTE. Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A2.
BRITISH RAINFALL.

Kept at Bilton Sewage Works
Yuk
in the County of Harrogate Corporation
by Harrogate Corporation

Pattern Glaisher
RAIN GAUGE Diameter of top 8 in.
Height of top above Ground 1 ft. — in.
" " Sea Level 208 ft.
Time of Observation 9 1/2 am
Nearest Railway Station { Name Widd
Distance 1 1/4 Direction N

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

Kept at Moorlands
in the County of York.
by Edward G. Tew

Pattern Rose
RAIN GAUGE Diameter of top in. Self registered
Height of top above Ground 1 ft.
Sea Level 53 ft.
Time of Observation 9 A.M.
Nearest Railway Station Name Buntingborough
Distance 1 1/2 Direction West

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2
BRITISH RAINFALL
7 JAN 1911

Kept at Hunsworth Hall
in the County of Yorkshire
by Thomas L. Bernal

Pattern
RAIN GAUGE Diameter of top 5 in.
Height of top above Ground 14 ft. in.
" " " Sea Level ft.
Time of Observation 9 Apr
Nearest Railway Station { Name Hunsworth
Distance 2.5 Direction N.E.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

Card for wrong day 10. 7. 10.

FORM A2.
BRITISH RAINFALL
JAN 1910

Kept at Yateholme
in the County of York
by Oscar J. Kirby AM.S.B.

Pattern Stoat fange
RAIN GAUGE Diameter of top 9 in.
Height of top above Ground 1 ft. 0 in.
" " " Sea Level 861.33 ft.
Time of Observation 9 A.M.
Nearest Railway Station { Name Holmforth
Distance 4 miles Direction North

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

Jan. 1, following.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.
-5 JAN 1911

Kept at Strougham Hall
in the County of York 4
by Sir W. St. A. Worsley Bart.

Pattern
RAIN GAUGE Diameter of top 5 in.
Height of top above Ground — ft.
" " " Sea Level 120 ft.
Time of Observation 9 a.m.
Nearest Railway Station { Name Strougham Spec
Distance 1/2 m. Direction E.N.E.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909.

FORM A2.
BRITISH RAINFALL.
JAN 1910

Kept at Huddersfield Cemetery
in the County of - York -
by Mr. J. Firth

Pattern Snowdon (Glasgow)
RAIN GAUGE
Diameter of top 8 in.
Height of top above Ground one ft.
Sea Level 410 ft.
Time of Observation 9 A.M.
Nearest Railway Station { Name Huddersfield
Distance one mile Direction SE

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL
10 JAN 1911

Kept at *Huddersfield Cemetery*
in the County of *York*

by *Mr J. Firth*
Moffa Second order Station

Pattern *Wicks Ground*
RAIN GAUGE Diameter of top *8* in.
Height of top above Ground *one* ft.
" " Sea Level *410* ft.
Time of Observation *9 am*
Nearest Railway Station { Name *Huddersfield*
Distance *one* mile Direction *SW*

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

Jan. 1, following.

by J. W. Roberson

Receiver Gauge. { Above Ground. *12"*
Above Sea Level. *350 ft.*

CONDENSED INSTRUCTIONS.—Fix the gauge firmly, with its orifice level and 1 ft. above the ground, quite clear of trees and walls, empty it daily at 9 a.m., and enter it against the preceding day. Snow should be melted slowly in a closed vessel and the amount entered as rain, an "S" being prefixed. With a low temperature and high wind, it is sometimes blown out of the funnel; then take one-twelfth of the average depth of snow and enter that as the yield of water—e.g., 3 inches snow = .25 of rain. When there is no rain, a line should be drawn, rather than cyphers inserted.

REGISTER OF RAINFALL IN 1901

Kept at Dalton, Huddersfield

by J.W. Robson

Latitude 53° 39' N

Time of Observation 9 a.m.

Height of Receiver of Rain Gauge.

Above Ground 12"

Longitude 1° 46' W

Above Sea Level 350 ft

CONDENSED INSTRUCTIONS.—Fix the gauge firmly, with its orifice level and 1 ft. above the ground, quite clear of trees and walls, empty it daily at 9 a.m., and enter it against the preceding day. Snow should be melted slowly in a closed vessel and the amount entered as rain, an "S" being prefixed. With a low temperature and high wind, it is sometimes blown out of the funnel; then take one-twelfth of the average depth of snow and enter that as the yield of water—e.g., 3 inches snow = .25 of rain. When there is no rain, a line should be drawn, rather than cyphers inserted.

Observers will oblige by sending duplicates of this Register, or even the monthly totals, to Mr. G. J. Symons, of 62, Camden Square, London, N.W., for insertion in his annual tables of British Rainfall, which now contain returns from more than 1500 stations. Additional copies of this form (price 3d. each) can be obtained of the above, from Mr. STANFORD, 6 & 7, Charing Cross, and from all the leading opticians.

REGISTER OF RAINFALL IN 1910

BRITISH RAINFALL FORM A. 1/21
24 JAN 1911

Kept at *Hull Pearson Park*
in the County of *Yorkshire E. R. 3*
by *H. B. Witty*

Pattern
RAIN GAUGE Diameter of top in.
Height of top above Ground ft. in.
" " " Sea Level 6 ft. 3393
Time of Observation
Nearest Railway Station { Name
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A2.
BRITISH RAINFALL
14 JAN 1910

Kept at Springhead Pumping Station
in the County of Yorkshire
by E. B. Newton M.S.C.E.

Pattern
RAIN GAUGE Diameter of top 5 in.
Height of top above Ground 1 ft. 0 in.
" " " Sea Level 15.55 ft.
Time of Observation 9 a.m.
Nearest Railway Station { Name Willerby
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.
17 JAN 1911

Kept at Springhead Pumping Station
in the County of Yorkshire
by C. B. Newton M.I.B.E.

Pattern
RAIN GAUGE
Diameter of top 5 in.
Height of top above Ground 1 ft. 0 in.
" " " Sea Level 15.55 ft.
Time of Observation 9 A.M.
Nearest Railway Station { Name Willerby
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL
- 6 FEB 1911

Kept at Lekey
in the County of York
by G. W. Worford

Pattern
RAIN GAUGE Diameter of top 5 in.
Height of top above Ground 20 ft. — in.
" " " Sea Level 312 ft.
Time of Observation 9 am
Nearest Railway Station { Name Lekey
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

Jan. 1, following.

REGISTER OF RAINFALL IN 1910

Kept at Silverwell Elkeley
in the County of York
by Thos G. Gill

Pattern Snowdon
RAIN Gauge Diameter of top 5 in.
Height of top above Ground 1 ft. 0 in.
" " " Sea Level 904 ft.
Time of Observation _____
Nearest Railway Station { Name Elkeley
Distance 2 miles Direction East

Jan. 1, following.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

by P. Huntington Esq

Pattern
RAIN GAUGE Diameter of top in.
Height of top above Ground ft. in.
" " " Sea Level ft.
Time of Observation
Nearest Railway Station Name Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

FORM A2
BRITISH RAINFALL
31 JAN 1911

Kept at Goldborough Hall
in the County of W. Riding, Northern
by Mr R. Goodall

Pattern
RAIN GAUGE Diameter of top 5 in.
Height of top above Ground 1 ft. in.
" " " Sea Level 118 ft.
Time of Observation
Nearest Railway Station { Name
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

FORM A2.
BRITISH RAINFALL.
- 4 APR 1910

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

Langsett Gauges
Kept at (Upper Mithope)
in the County of Yorkshire
by L. S. M. Marsh.

Pattern "Snowdon" Pattern
RAIN GAUGE Diameter of top 8 in.
Height of top above Ground 1 ft. 6 in.
" " " Sea Level 924.58 ft. 3151
Time of Observation 9 a.m.
Nearest Railway Station { Name Hazlehead
Distance 3 miles Direction N.W. by N

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910.

FORM A2.
BRITISH RAINFALL
13 FEB 1911

Kept at Holbeck R.
in the County of York.
by Chas. G. Henzelle
Waterworks Engineer, Leeds.

Pattern Snowden
RAIN GAUGE Diameter of top 8 in.
Height of top above Ground 9 ft.
" " " Sea Level 93 ft.
Time of Observation _____
Nearest Railway Station { Name B. G. + L. + N. W. R. Joint.
Distance 1/2 mile Direction _____

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

Kept at Dale Dike
in the County of York & shore
by L. S. M. Marsh.

RAIN GAUGE
Pattern
Diameter of top in.
Height of top above Ground ft.
" " Sea Level ft.
Time of Observation before
Name
Nearest Railway Station Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

FORM A2
BRITISH RAINFALL
395
- 5 FEB 1910

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

FORM A2.
BRITISH RAINFALL
4 APR 1910

Kept at *Houch Rd, Langsett (No1)*

in the County of *Yorkshire*

by *A. S. M. Marsh*

Pattern
RAIN GAUGE { Diameter of top *2* in.
Height of top above Ground *2* ft. in.
" " " Sea Level *2* ft.
Time of Observation
Nearest Railway Station { Name
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in “*Rules for Rainfall Observers*,” sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

FORM A2.
BRITISH RAINFALL.
16 MAR 1911

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

Jan. 1, following.

REGISTER OF RAINFALL IN 1907

FORM A.
BRITISH RAINFALL.

Kept at *Malham Tarn*
in the county of *York*
by *Thomas Coulthard*

Lat. *54°* Long. *2° 10'*
Nearest Railway Station *Settle*
Time of Observation *9 a.m.*
Diameter of Rain Gauge *5* in.
Height of top of Gauge above Ground *1* ft. *0* in.
Sea Level *1296* ft.

NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. Full instructions for the measurement of rain and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.
